

Reflection on *The Lonely Octopus*

1. How do you think Octavia felt at the beginning of the book when she believed she was different than everyone else?

2. How would you feel if you were the only one in your class with 8 arms?

3. Later in the book, Octavia realizes that what made her unusual were actually very special things. List at least one thing that makes *you* special.

4. Think about one person in your class. What is one thing that makes that person special?
